

Enclosures

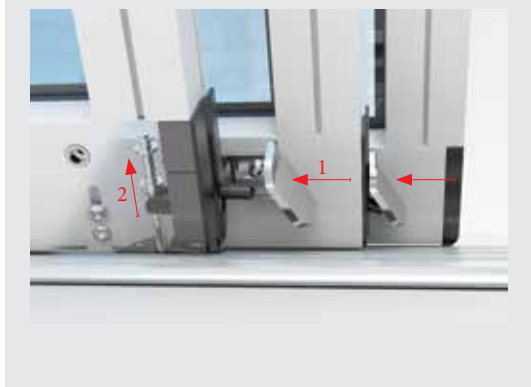

AQ Box DIY Pool Enclosure

Supplied flat-packed and ready to build

AQ Box enclosures come in 3 different sizes with 2 different glazing options and can be ordered all year long from European stock. The parts are placed inside a wooden box together with the assembly manual that ensures easy DIY assembly.

Child Protection - Segment Locking
The AQ Box enclosures come with a state-of-art locking system that includes a unique design key.

This multi functional lock was designed and produced by Aquacomet therefore it is patented. The innovative solution provides positioning and securing on the rails as well as ensures child safe locking.

Segment Rubber - High quality silicone rubber provides great insulation between the segments. It only touches the segments when they are in a closed position to avoid damage when the segments move.

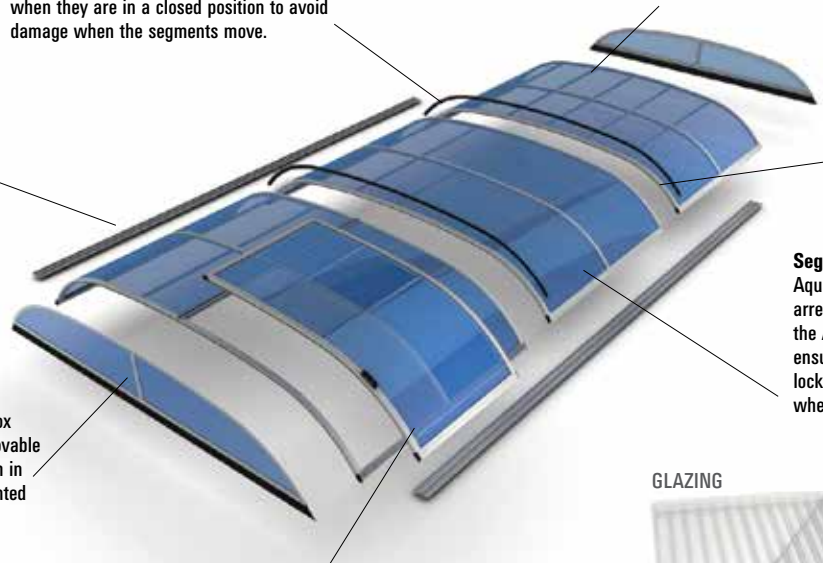

Rounded Profiles - The enclosure parts are produced of elegant, rounded anodized aluminum alloy profiles developed and patented by Aquacomet.

Plastic End Caps - The horizontal profiles, which collect all the arches, include aesthetic plastic molded end caps that are also designed to accommodate the special arrest system.

Rails - The 20 mm tall rails are secured to the ground to ensure easy gliding of the segments and the steel wind hooks provide permanent wind and storm protection.

Segment Positioning - Aquacomet developed special arrest system is installed in the AQ box enclosures that ensure child safe and easy locking of the segments when they are out of use.

Front & End Walls - AQ box enclosures come with removable front and back walls - both in one piece - with side mounted sliding doors.

Glazing - Both types of AQ box enclosures' glazing panels, 6mm double wall Polycarbonate or 3 mm SAN solid, are UV protected on both sides.

Aquacomet Enclosures From Certikin

A telescopic pool enclosure is the perfect answer to the changeable British climate as it allows an outdoor pool to be converted to an enclosed pool in a matter of minutes.

Certikin offer a huge range of enclosures which are suitable for any pool size or shape and will fit into most environments, because of the colour options and styles that are on offer. The range has low level type enclosures to the full height fixed style with a 'wooded' effect finish, there is something for everyone.

Swimming pools in your garden offer a source of fun for the whole family, and having an enclosure allows you and your family to enjoy the pool for most of the year, even during bad weather.

An enclosure can also add peace of mind by helping to secure the pool from unsupervised access. They help to protect your pool environment from the outside elements, and decrease the amount of chemicals that are required in looking after the water. They help to stop leaves and debris from entering the pool and help to keep the heat inside, as well as reduce the costs of pool water heating. All in all a great accessory to your pool.

The use of an enclosure need not be limited to covering a swimming pool to extend the seasons. Lean-to options are available that can be used against the back of a house or even to cover a restaurant terrace. The options are endless - the decision is yours.

The service we can offer:

- Free site survey
- Supply only
- Supply and installation
